unIFY Control Panel
unD3IO Configuration
The configuration software for the unD3IO is organized into the following key sections:

- Inputs
- Outputs

*Note: Any changes made to device settings will only persist until power is cycled on the device. To retain the settings, they must be stored to Preset 0 using the Save Presets feature within unIFY Control Panel.

**Inputs**

**Dante™ TX Channel Name**

This text field reports the Dante™ transmit channel name shown on the Dante™ network for corresponding analog input channels.

*Note: This field is non-editable. To edit the channel names, use the device list view control or us Dante™ Controller.

**Preamp Control**

The Preamp Control section allows the user to adjust the microphone preamp gain settings and phantom power states for the corresponding inputs.
Input Select Control

*Note: The unD3IO has two Dante™ transmit channels. The first is connected to the XLR input. The second is a mono sum of the selected stereo line level input(s).

The unD3IO features an input selection option for the line level analog inputs routed to the second Dante™ transmitter channel. Using option A selects the mono mix of the two RCA inputs. Using option B selects the mono mix of the two stereo jack inputs and using option A+B selects options A and B mixed together.

Dante™ TX Channel Status

This text field reports the number of active Dante™ receive devices for the corresponding transmitter channel. If no devices are subscribed to the transmitter channel the text field will report None.

*Note: This is a read-only field and any channel routing configuration must be performed within Dante™ Controller.

Outputs

Dante™ RX Channel Name

This text field reports the Dante™ receive channel name shown on the Dante™ network for corresponding analog output channels.

*Note: This field is non-editable. To edit the channel names, use the device list view control or use Dante™ Controller.

RX Channel Assignment

This text field reports the currently assigned Dante™ transmit channel to the corresponding receive channel. If no channel is assigned, the text field will report None.

*Note: This field is non-editable. To edit the channel names, use the device list view control or use Dante™ Controller.
