The configuration software for the unDX210 is organized into the following key sections:

- Inputs

*Note: Any changes made to device settings will only persist until power is cycled on the device. To retain the settings, they must be stored to Preset 0 using the Save Presets feature within unIFY Control Panel.

Inputs

Dante™ TX Channel Name
This text field reports the Dante™ transmit channel name shown on the Dante™ network for corresponding analog input channels.

*Note: This field is non-editable. To edit the channel names, use the device list view control or us Dante™ Controller.

Preamp Control
The Preamp Control section allows the user to adjust the microphone preamp gain settings and phantom power states for the corresponding inputs.
Dante™ TX Channel Status

This text field reports the number of active Dante™ receive devices for the corresponding transmitter channel. If no devices are subscribed to the transmitter channel the text field will report None.

*Note: This is a read-only field and any channel routing configuration must be performed within Dante™ Controller.*
