unIFY Control Panel
unDX2IO+ Configuration
The configuration software for the unDX2IO+ is organized into the following key sections:

- Inputs
- Outputs

*Note: Any changes made to device settings will only persist until power is cycled on the device. To retain the settings, they must be stroed to Preset 0 using the Save Presets feature within unIFY Control Panel.

Inputs

Dante™ TX Channel Name
This text field reports the Dante™ transmit channel name shown on the Dante™ network for corresponding analog input channels.
*Note: This field is non-editable. To edit the channel names, use the device list view control or use Dante™ Controller.

Preamplifier Controls (Inputs 1 & 2 only)
The preamplifier control section allows the user to adjust the microphone preamp gain settings and phantom power states for the corresponding XLR inputs.

Pad Controls (Inputs 3 & 4 only)
The pad control section allows the user to adjust the preamp gain settings for the corresponding Phoenix connector inputs. Each input can be set to either a Pro or a Consumer setting depending on the expected input level.

Dante™ TX Channel Status
This text field reports the number of active Dante™ receive devices for the corresponding transmitter channel. If no devices are subscribed to the transmitter channel the text field will report None.

*Note: This is a read-only field and any channel routing configuration must be performed within Dante™ Controller.

Outputs

Dante™ RX Channel Name
This text field reports the Dante™ receive channel name shown on the Dante™ network for corresponding analog output channels.

*Note: This field is non-editable. To edit the channel names, use the device list view control or use Dante™ Controller.

Volume Control
The volume control allows the user to adjust the audio level of the corresponding analog output. Volume settings are between 0 and -60dB.

*Note: The volume control does not apply any gain to the output signal. It is only an attenuation control.

© QSC, LLC 2020
Mute Control
The mute control allows the user to mute/unmute the corresponding analog output.

RX Channel Assignment
This text field reports the currently assigned Dante™ transmit channel to the corresponding receive channel. If no channel is assigned, the text field will report None.

*Note: This field is non-editable. To edit the channel names, use the device list view control or use Dante™ Controller.
